## Moveable Cogent™

The Moveable Cogent™ is designed for teaching institutions. The vertical head-wall provides Vacuum, Air, and simulates Oxygen by plugging into an electrical outlet. It is an inexpensive method for simulating a patient room's medical gas, while giving the freedom of a moveable simulation solution that maneuvers easily from one bed to the next. US Patent # 7,878,809

### Features/Specifications:

- Save thousands of dollars over a traditional centralized system
- Avoid the expense and time to install a centralized pump / compressor and a piping network
- In a few hours you have a fully functional patient room simulation with working, Air, Vacuum, and simulated Oxygen service with hospital accurate flow rates and hospital grade receptacles
- Cogent™ Headwalls can be added one at a time as budgets permit
- Cogent™ Headwalls can move easily when lab spacing needs change
- Locking Casters, 2 Fixed and 2 moveable, for easy maneuverability
- Mobile solution for simulated services anywhere within six feet of an electrical socket and moving from bed to bed
- Cogent™ Headwalls compliment simulation, not designed to run a simulation manikin. Maximum 50PSI
- Blanks for Nurse Call and Code Blue Provisions is standard

### Options:

- Available in Single Sided and Dual Sided configurations
- Integrated Non-Functional Nurse Call
- Integrated Non-Functional Code Blue
- Integrated White Dry Erase Board
- Oxygen Flowmeter
- Medical Air Flowmeter
- Vacuum Regulator [Continuous]
- Vacuum Regulator [Continuous/Intermittent]
- Vacuum canister and holder
- Additional Mounting Brackets as requested
- Delete pump and/or compressor

### Available Accessories:

- Utility Basket
- Sphygmomanometer Mount
- Sphygmomanometer Cuff with Basket
- Sharps Container with Mount
- Single Hook I.V Arm
