

ARE YOU TIRED OF SAYING, "LET'S JUST PRETEND"?

Get the only real world automated dispensing cabinets and bedside eMAR tailored to simulation and practice environments. SimServeRx[®] provides a medication management system for simulation with unlimited and customizable solutions for any simulation environment.

SIMRESET

Easily recreate medication administration simulations with the push of a button for consistent skill validation

SIMTIME

Adjust software time to simulate medication administration at any hour, regardless of the actual time.

INTEGRATED eMAR SUPPORT

Workflow can include dispensing medication from the medication cabinet and administering via our integrated eMAR SmartStation.

PRELOADED DATABASE

Preloaded patients, medication orders, users and barcoded PractiMeds and Demo Dose medication formularies.
